

City Government:

Description:

The government needs a new database design for storing various information. Suggested tables are:

Employee (ID, Name, Surname, Address, Salary)

Room (Number, Name, Description, ID->Employee, Name->Furnish)

Event (Nr->Room, ID->Employee, Date, Description)

Furniture (Name, Price, Condition)

Exemplary queries are:

- a) What is the average salary of employees working in room 9?
- b) How many employees use a printer?
- c) Give the maximum number of furniture of a room that was used on 17.01.2019.
